

ITAIGUARA DE OLIVEIRA BEZERRA

Senior Economist & Data Economist

Phones: +55 21 99445-7909 — +55 21 3100-7095 • E-mail: itaiguara@terra.com.br

Academic Portfolio (Lattes): lattes.cnpq.br/6607723810297253

Academic Background

M.Sc. in Business Economics and Finance **2014**

Fundação Getulio Vargas (FGV-EPGE / IBRE) – Rio de Janeiro (CAPES Grade 5)

Thesis: “Non-Inflationary Rate of Capacity Utilization: An Approach Using Brazilian Microdata”

Examination Board: Ricardo de Oliveira Cavalcanti (FGV), Rafael Chaves Santos (BACEN), and Angelo Polydoro (Advisor).

Methodological Summary: Proposal of an empirical specification and modeling of a Non-Inflationary Rate of Capacity Utilization (NIRCU) for the Brazilian macroeconomic scenario. The study leveraged structured microdata from the Manufacturing Industry Survey combined with the behavior of the Broad Producer Price Index - M (IPA-M) from FGV/IBRE. Three distinct empirical measures were calculated and validated: Survey NIRCU, Coincident NIRCU, and Leading NIRCU. Model consistency was stress-tested against output gaps mapped in literature using Ordinary Least Squares (OLS) estimations.

MBA in Corporate Management and Finance **2002**

Fundação Getulio Vargas (FGV) – Rio de Janeiro

Specialization in Economic Engineering and Industrial Organization **2000**

Universidade do Estado do Rio de Janeiro (UERJ) – Rio de Janeiro

B.Sc. in Economics **1999**

Universidade Federal do Rio de Janeiro (UFRJ) – Institute of Economics (Praia Vermelha)

Professional Experience

Economic Analyst (Independent Contractor / Consulting) **2021 – Present**

Fundação Getulio Vargas (FGV) & SEBRAE Nacional

- Conducted periodic macroeconomic analyses focusing on the performance of Micro and Small Enterprises (MSEs) nationwide.
- Collected, structured, and processed primary survey microdata for the design and synthesis of the monthly analytical report for the **Micro and Small Enterprises Confidence Index (IC-MPE)**, a joint initiative between FGV/IBRE and SEBRAE.
- Developed and maintained statistical data tables and macroeconomic vector graphics applied to support institutional business cycle reports.
- Statistically processed indicator time series and implemented consistency routines to eliminate structural breaks.

Technical Coordinator (Independent Contractor / Consulting) **2023 – 2025**

Fundação Getulio Vargas (FGV) — International Directorate (DINT)

- Directly responsible for managing, collecting historical regional data, and structurally preparing the datasets associated with the **Latin American Survey**.
- Technically processed complex statistical matrices, executing outlier removal, lag adjustments, and consistency routines for time series across multiple countries in the region.
- Formulated and implemented global economic scenario projections backed by applied econometric methods and machine learning algorithms adapted to sectoral data behavior.

Economic Analyst (Independent Contractor / Consulting) **2021 – 2024**

Fundação Getulio Vargas (FGV) — Sectoral Directorate

- Managed data ingestion, structuring, and consistency checking for historical databases dedicated to the macroeconomic market of cultivated trees in Brazil and abroad.
- Applied econometric models and specific estimators to project short- and medium-term trends in supply, sectoral demand, and price curves.
- Acted directly in statistical data collection, empirical review, technical drafting, and final edition of the descriptive core of the **Brazilian Tree Industry Yearbook (Ibá)**.

Graduate Professor (Lato Sensu) & Content Evaluator

2017 – 2022

Universidade do Grande Rio (UNIGRANRIO)

- Taught in-person executive specialization courses, lecturing on Quantitative Methods Applied to Management, with an emphasis on descriptive and inferential statistics applied to corporate decision-making.
- Analyzed, critically reviewed, and technically evaluated educational content for Distance Learning (EaD) platforms, covering Advanced Financial Mathematics, Capital Structure, Long-Term Financing Sources, Valuation, and Mergers and Acquisitions (M&A).

Economic Analysis Specialist

2010 – 2018

Fundação Getúlio Vargas (FGV) — Assistant Superintendency for Economic Cycles (SACE)

- Coordinated technical operations, data consistency routines, and official monthly disclosures for the **Construction Industry Survey (Sondagem da Construção)**.
- Coordinated operations and data processing for the **Composite Indexes of the Brazilian Economy**, structured via international technical cooperation with the American institute **The Conference Board (TCB)**.
- Served as the alternate institutional spokesperson for the Labor Market Indicators (Leading Employment Index and Employment Confidence Index).
- Technical lead for the analytical design, empirical research, and methodological implementation of the **Capacity Utilization Rate (NUCI) applied to Non-Manufacturing Sectors** in the domestic economy.
- Developed research and applied advanced statistical and econometric tools to evaluate economic cycles, employment dynamics, and identify macroeconomic turning points within SACE.
- Acted as an active institutional press contact for national media outlets to provide technical presentations and analytical context on survey findings.

Logistics & Economic-Financial Project Analyst

2007 – 2009

GEFCO Logística do Brasil Ltda. (PSA Peugeot Citroën Group)

- **Dedicated In-House Placement at TKCSA (2008–2009):** Managed operational and technical planning, transport logistics, and structural flow control for heavy vehicles, raw materials, and components at the steel plant construction site. Formulated, measured, and tracked Key Performance Indicators (KPIs) to compile analytical non-compliance reports.
- **Logistics Studies & Project Analyst (2007–2008):** Coordinated economic viability studies and financial appraisals for logistics engineering projects, applying analytical toolkits for projected cash flows, Net Present Value (NPV), Internal Rate of Return (IRR), and discounted payback period. Formulated statistical modeling and optimized automotive supply transport routes.

Corporate Strategic Planning Analyst

2004 – 2007

Instituto Nacional de Metrologia, Normalização e Qualidade Industrial (INMETRO)

- Led internal methodological training, deployment support, and managerial oversight for Strategic Planning across central directories and regional state delegated bodies (IPEMs) nationwide.
- Mapped corporate workflows and consolidated institutional projects using performance indicator management systems via balanced scorecards.
- Drafted descriptive project reports, framework manuals, and technical presentations grounded in Project Management methodologies (PMI standards), Business Process Management (BPM), and **Balanced Scorecard (BSC)** frameworks.

Market Indexes Analyst

2004

Fundação Getúlio Vargas (FGV) — Market Projects

- Analyzed financial statements and balance sheets of the largest publicly traded corporations in Brazil for database ingestion, liquidity coefficient metrics calculation, and reporting for the **FGV 100** market index disclosure.
- Coordinated fieldwork operations, checked methodological consistency, and calculated statistical outputs for the **Consumer Expectations Survey**.
- Collaborated technically on the processing and analysis of primary data associated with the Manufacturing Industry Survey.

Structural & Sectoral Indexes Analyst

2002 – 2004

Fundação Getúlio Vargas (FGV) — Macroeconomic Indexes

- Collected raw material input prices, managed historical series, and drafted analytical reports for industrial and civil engineering cost indexes, focusing on the **Basic Unit Cost (CUB)**, Roadwork Indexes, and Public Works Indexes.
- Monitored statistical changes, performed systematic tabulations, and executed technical analyses on cement and derivatives price fluctuations under direct contract for the National Cement Industry Union (SNIC).

Economic Analysis Technician (Costs & Bidding Procedures)

1999 – 2001

Fundação Getúlio Vargas (FGV) — Institutional Projects

- Analyzed structural industrial costs, broke down budgetary input spreadsheets, and engineered technical proposals for large-scale engineering public tenders.
- Developed statistical analyses to back institutional contracts and bidding procedures established with public and mixed-economy entities, including the Municipality of Rio de Janeiro, Eletrobrás, and the Court of Auditors of Bahia (TCE-BA).

Technical Competencies & Scientific Toolkit

Category	Tools, Softwares, and Methods
Data Science & ML	Python Language, R Language, Machine Learning (XGBoost, CatBoost, and LightGBM Algorithms – Boosting Triad), Feature Engineering, Cross-Validation, Model Interpretability via SHAP Values.
Applied Econometrics	Markov-Switching Dynamic Models (Regime Shifts), Vector Error Correction Models (VECM), Vector Autoregressions (VAR), Statistical Modeling of Time Series, Structural Models.
Software & Databases	EViews, STATA, OxMetrics (STAMP package for structural time series models), SQL (Structural Logic, Complex Queries, and Relational Database Manipulation / SQLite), Advanced Excel.
Data Visualization	Power BI (Analytical Dashboard Engineering), scientific stack visualization libraries (Matplotlib, Seaborn).
Languages	English: Fluent (full proficiency for technical reading, writing, and professional speaking; drafting international reports and participating in academic conferences). Spanish: Intermediate.

Intellectual Production, Press & Extension

Selected Academic Production (Peer-Reviewed Journals)

- **BEZERRA, Itaiguara.** *Índice de Incerteza Empresarial: Uma Abordagem usando Microdados de Sondagens.* Revista Economia Aplicada (Qualis-CAPES A3), v. 21, no. 4, pp. 659-679, 2017.

- **BEZERRA, Itaiguara; MALGARINI, Marco.** *A new measure of the non-inflationary rate of capacity utilisation for the brazilian economy.* Revista Economia Aplicada (Qualis-CAPES A3), v. 20, no. 4, pp. 441-454, 2016.

International Conferences & Congresses

- **CIRET Conference (Centre for International Research on Economic Tendency Surveys).** Active participation and presentation of scientific contributions aimed at analyzing economic cycles, macroeconomic trends, and capacity utilization measurement based on corporate survey microdata.

Media Presence (Role as Business Cycle Analyst)

Frequent institutional spokesperson and analyst for IBRE/FGV's SACE. Responsible for translating business cycle data and monthly macroeconomic indicators into analytical insights for civil society and financial markets, resulting in dozens of press interviews and expert citations across major national media networks, including: *Valor Econômico*, *O Estado de S. Paulo (Estadão)*, *Folha de S. Paulo*, *BandNews Radio & TV*, *Rede Vida*, and *Portal R7*.

Advanced Technical Extension Courses

- **Statistical Learning (2020)** — Stanford University (Theoretical and mathematical foundations in supervised learning, penalized regression models, decision trees, and introduction to neural networks).
- **Investment Analysis and Decision Making (2008)** — Regional Economics Council (CORECON-RJ).
- **Measurement System Planning (2006)** — Fundação Nacional da Qualidade (FNQ).
- **Introduction to Project Management (2005)** — INMETRO.
- **Integrated Courses in Health Surveillance (2023)** — Universidade Federal de Santa Catarina (UFSC).
- **Capital Markets: Products and Risks (2001)** — Fundação Getulio Vargas (FGV).
- **Applied Financial Mathematics (2000)** — FGV.
